LANGUAGES

Lorem ipsum, Dolor sit amet,
Consectetuer

Companies with diversified products and ranges, higher SKUs always want to have a solution that speaks the mind of the market, translates the competition activities, and drives the business with data-driven logic.

Hrx

HRX is a cloud-based HRMS system that handles all of your HR management needs while you focus on your people. HRX handles everything from employee recruitment to payroll to Time Sheet organization.

Analyticx

The campaign started, all your armors in the market for the best impact- are you sure? Do you have the monitoring and evaluation tool to support your last move? Do ROI and awareness rise once you unleash your campaigns?

DDC

A data extraction tool, more specifically, provides multidimensional enterprise support in terms of data gathering, data curating, GEO tagging, and ultimately, dynamic data vs. use. As such, it is the first of its sort in Bangladesh, and it is available in both apps and web services.

Axs

Axs is the corridor of all access to issues we might need to resolve in our professional and personal setup. All we need is task identification and the brevity of the tasks to be engaged in such a manner that issues get noticed, tracked, escalated to the right audience, and gets resolved.

FieldX

Precisely, a data extraction tool offers multidimensional enterprise support in relation to data capturing, data curating, GEO tagging, and finally descending to a dynamic data vs. utilization. First-of-its-kind in Bangladesh as such available both in apps and web services.
